

Supporting Learning & Science at Home

A FREE virtual workshop for parents/caregivers of school-age children

Learning in a virtual world can be filled with rich, open, visual and creative experiences. It can also be filled with missed opportunities, frustration, and anxiety. In this workshop, we will engage in hands-on science activities and explore the benefits of learning and teaching for a growth mindset.

Join us is for a free, fun, and interactive session to discover ways to help your child approach learning with curiosity, courage, confidence & intuition. Come and have fun with Explora, APS and other parents to grow your brain by making mistakes, and have fun while doing it!

To participate:

- **Your school administrator will share the time and date of the session, as well as information on how to join**
- **For more information, please contact your school.**
